

Linux Current and Future Technologies seminar the 23rd of March 2010

Everybody's talking about the future of Linux. There are many open questions to answer. Will businesses stay the way they are, move to more open platforms and desktops, or shift in a big way to cloud computing and SaaS? IBM is very positive about the future prospects of Linux and open source. Come to the Current and Future Technology Linux Seminar at IBM to find out what's new with Linux and how other customers are already enjoying the benefits of next generation Linux solutions.

THE SEMINAR WILL INCLUDE:

- * IBM executives and Linux specialists describing best practices for implementing Linux for business-critical workloads
- * Novell's and Red Hat's technical Linux leads reviewing recent and future enhancements to Linux
- * Presentations on Enterprise Linux Servers Emerging Linux Technologies, and Linux and the Desktop of the Future
- * Reference customer cases describing the experiences of Linux for business-critical workloads
- * Panel discussion with leading Linux experts with a live Q&A session.
